

# **Kitchen & Bath Designer**

**\*\*\$2,000 sign on bonus\*\***

Do you thrive on big expectations? Can you not get enough of design and drawings?  
Are you well schooled in all the amazing products that make kitchens and baths dreamy?

Then we may be the right fit for each other!

Bell Home Solutions has better than 55 years of remodeling experience, and more recently is experiencing rapid growth! In order to provide the world class service that we refuse to compromise on, it's time to find a full time 20-20 CAD designer that can assist our Design & Remodel Consultants by providing drawings and designs to our customers in a timely fashion.

We are seeking a qualified, experienced, tech-savvy kitchen designer with proven kitchen and bath design skills, and mad 20-20 or CAD abilities. The most qualified candidate will also possess an out-of-this-world work ethic and strong organizational habits, proving they can exceed the expectations of an incredibly loyal customer base. A background with plumbing fixtures and electrical/lighting is also critical as product sales is a significant part of the position as well. There will be additional opportunities, such as having input on keeping our 8,500 square foot showroom ahead of the latest trends. Candidates with a college degree in interior design, construction management, architecture or a designation from NKBA will be given the highest consideration, but industry experience (including box store experience) is critical for this position.

We're a drug-free, equal opportunity employer, and a solid 4th generation family owned and operated business. Compensation includes a competitive wage with bonus potential and a very strong benefits package.

Please apply via email in person at 2150 S. Abilene St., Aurora, CO 80014 or reply to this posting.
